Create questions in PRS, import from publishers, or use PowerPoint®

Instant grading and reporting features

PRS infrared transmitter also available

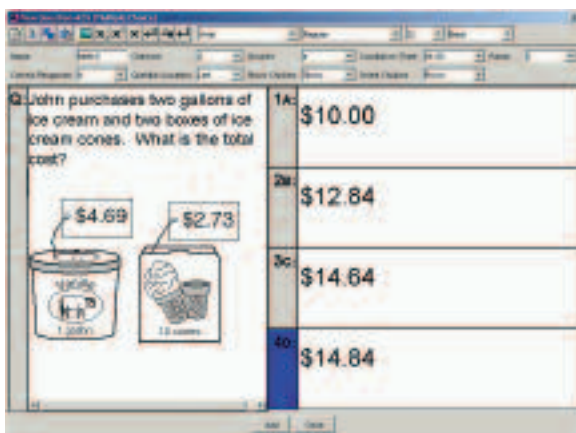

InterWrite™ PRS is a powerful student response system that combines interaction and assessment to enhance classroom productivity. No child is left behind when all students participate by answering questions with a simple click of a button. The newest addition to the **InterWrite™ PRS** family, **InterWrite™ PRS RF**, gives teachers even more options to teach and assess their students. **InterWrite™ PRS RF** features a 2-line LCD display that allows students to see their answers and receive instant notification that they were successfully transmitted. The 16-character display is also ideal for self-paced exams, especially in high-stakes state testing, where students can easily scroll through a series of questions and answer at their own pace. With **InterWrite™ PRS RF**, students's responses can include positive and negative numbers, decimal points, fractions, multiple correct answers, answer series, and even short answers. Teachers now have a powerful tool to go beyond asking simple multiple choice and true/false questions. Whether **InterWrite™ PRS** is used to take attendance, give quizzes or tests, analyze student assessment data and reports, or just perform a quick lesson review - teachers can focus more time on teaching and less time on paperwork and grading.

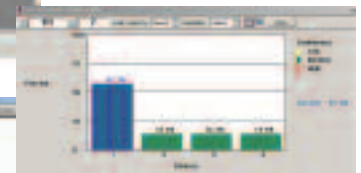

Students are excited and eager to respond interactively

The Most Robust Student Response System Available

Change any PowerPoint® slide into a PRS question slide

- Build questions with PRS software
- Import questions from leading publishers
- Create questions on the fly with PRS or use InterWrite™ Software
